

### Advancing Healthcare Business

EHNAC accreditation gives your prospects and customers full confidence in your privacy, security, performance, business practices and resources. With recognition from EHNAC, your organization raises awareness about the quality of its products and services as well as compliance with industry standards. In an increasingly competitive marketplace, EHNAC accreditation can build the trust that will advance your business.

## Outsourced Services Accreditation Program (OSAP)

---

Outsourcing of various services has become a large and growing need for companies that seek to create operational efficiencies and reduce costs. Therefore, many organizations are seeking to outsource such infrastructure management services as hardware, technical and call center 24/7 support, SLA-based and reliable services, and access to skilled pools of people with diverse expertise.

Based on the needs of organizations to supplement their infrastructure and provide the level of service with both cost-effective pricing and the quality in which customers expect, many are turning to outsource organizations to meet their needs and objectives. In an effort to provide a comprehensive set of accreditation programs for the healthcare industry, EHNAC has developed the OSAP to provide outsource service organizations a third-party review of their services. With this designation, they can confidently demonstrate their ability to meet healthcare requirements while ensuring trust and confidence.

Through OSAP, EHNAC assessors review your organization's electronic exchange of transactions and messages across five main categories of criteria:

- Privacy and confidentiality
- Technical performance
- Business practices
- Physical, human and administrative resources
- Information security

## Outsourced Services Accreditation Program (OSAP)

Through a self-assessment and site review process, your organization will ensure compliance with HIPAA rules, accommodation of industry standards and proper use of NCPDP, X12, HL7 and other relevant formats. You'll learn about methods and procedures that can improve your efficiency, elevate your service levels and position your organization for success. EHNAC criteria cover exchange of data, security, timeliness, accuracy, system availability, capacity monitoring, use of the Internet, data storage and retrieval, and much more. If an organization is currently EHNAC-accredited and utilizes an outsource vendor that has achieved EHNAC accreditation, then the site visit to that outsourcer will not be required.

OSAP accreditation will give your existing and prospective customers trust and confidence in your organization's ability to manage their data with integrity and effectiveness.

The Outsourced Services Accreditation Programs include:

Accreditation for backup media storage facilities

Accreditation for customer service/help desk operations

Accreditation for data center hosting facilities

Accreditation for disaster recovery facilities

Accreditation for network and system administrators

Accreditation for printing operations

Accreditation for product development operations

Accreditation for production operations

Accreditation for scanning operations
