

# EHNAC

## Advancing Healthcare Business

EHNAC accreditation gives your prospects and customers full confidence in your privacy, security, performance, business practices and resources. With recognition from EHNAC, your organization raises awareness about the quality of its products and services as well as compliance with industry standards. In an increasingly competitive marketplace, EHNAC accreditation can build the trust that will advance your business.

## e-Prescribing Accreditation Program (ePAP)

As electronic health networks gain momentum toward supporting the exchange of more clinical data, it's increasingly important that trading partners and their customers such as payers, providers, pharmacies and other stakeholders have assurance that the networks and applications in use are both robust and well-protected.

To achieve this, EHNAC's e-Prescribing Accreditation Program (ePAP) helps demonstrate the operational integrity of e-prescribing transaction networks, electronic health record systems, e-prescribing solution providers, and any other electronic health network or company that manages e-prescribing transactions on behalf of its customers.

Through ePAP, EHNAC assessors review your organization's electronic and fax-based transactions across five main categories of criteria:

- Privacy and confidentiality
- Technical performance
- Business practices
- Physical, human and administrative resources
- Security

Through a self-assessment and site review process, your organization will ensure compliance with HIPAA rules, accommodation of industry standards and proper use of NCPDP, X12, HL7 and other relevant formats. You'll learn about methods and procedures that can improve your efficiency, elevate your service levels and position your organization for success.

*"ePAP accreditation demonstrates that a company appreciates the importance of security and privacy and that they think carefully about operations from a resource and performance perspective as well."*

*Mark Gingrich  
Chief Information Officer

## Ensuring Confidence in Your Business

---

EHNAC criteria cover transmission of data, security, timeliness, accuracy, system availability, capacity monitoring, use of the Internet, data storage and retrieval, and much more.

**ePAP:** ePAP accreditation will give your existing and prospective customers confidence in your organization's ability to manage their data with integrity and effectiveness.

*“Security and data integrity are the most important factors driving the future success of electronic prescribing for controlled and non-controlled substances. Emdeon values our ePAP accreditation because it demonstrates that our security infrastructure, data handling and business procedures are trustworthy. We are very supportive of the adoption of ePAP accreditation throughout the industry.”*

*Rick Sage  
Vice President  
Clinical Services, Pharmacy
