Building Trust is Critical to the Success of Any HIE

Legislative initiatives in recent years have energized the need for improving connected care for patients across the United States. The growing number of HIE community-based initiatives are a testament to the shift in the healthcare system and a demonstration of the potential for health information exchange to improve efficiency and reduce health care costs nationwide that are occurring.

With privacy and security concerns at the forefront of any data exchange discussion, EHNAC’s Health Information Exchanges Accreditation Program (HIEAP) provides recognized third-party oversight for enhancing trust for your healthcare community by assessing your health information and oversight for meeting healthcare reform and privacy and security regulations.
Insights from an Accredited Organization

EHNAC accreditation helps us do a conscientious review of all policies and procedures relating to security and privacy, as well as our service delivery.

Teresa Rivera,
Assistant Executive Director

When privacy, security and confidentiality of healthcare data is on the line, a trusted name is a game-changer in today’s marketplace. EHNAC accreditation has been trusted and respected in the industry for more than 25 years.

HIEAP – designed for the HIEs themselves – focuses on technical performance, business processes, and resource management. EHNAC additionally offers OSAP-HIE accreditation for HIE technology providers. While the programs are similar, HIEAP includes criteria related to their governance structure, how they administer their HIE to a region or community, HIE-specific government requirements, etc.

Through HIEAP, your organization will discover ways to:

- Improve Efficiency
- Elevate Quality of Service
- Keep Up-to-Date with Current Marketplace Trends

Trust Is Everything in Healthcare

When privacy, security and confidentiality of healthcare data is on the line, a trusted name is a game-changer in today’s marketplace. EHNAC accreditation has been trusted and respected in the industry for more than 25 years.
